Guaranteed cup delivery. Infrared technology detects whether the cup has dropped, guaranteeing that your customers either receive their product or get their money back.

Providing larger cup sizes along with an outstanding cup of coffee gives consumers the quality and value they desire and are willing to pay more for. HDC2 delivers that dynamic by offering up to a 20 oz. cup size that competes effectively with retail coffee outlets.

The dramatically simplified "Easy Thread" filter paper system provides the perfect balance between brew quality and ease of use.

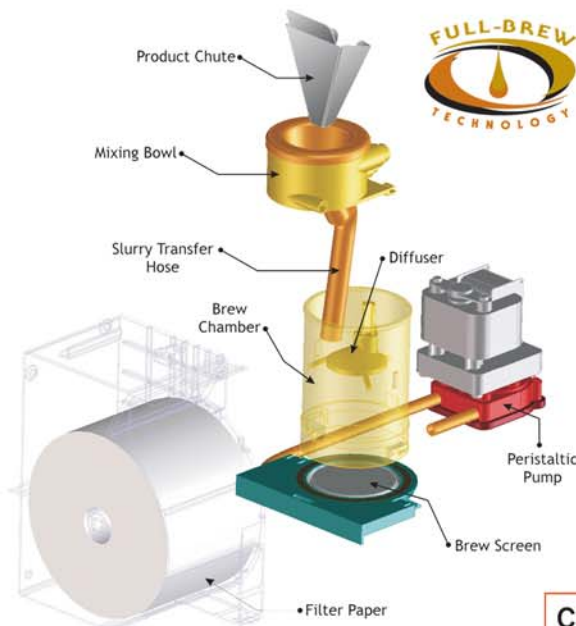

Enhanced dispense nozzle & mixing bowl design improves flow of product to prevent clogging. Mixing bowls are designed for a superior wash pattern.

Blending ratios can be adjusted from 15% to 85% providing complete taste profile flexibility. You can provide as many as 11 product choices to your customers.

Cup canisters tilt out to make loading easy. Choose two sizes ranging from 5 oz. to 20 oz. create the best value proposition for consumers and a ROI to match. With our unique cup ring design, most manual cups can be used with consistent dispensing reliability.

The Stately Art of Hot Drink Dispensing

At the heart of the Cafforia is Full-Brew... a revolutionary brewing technology that provides greater extraction, more total dissolved solids and more flavor than other brewing processes. The result is a rich and robust taste profile that will change the way consumers think about vended coffee.

Unique to Full-Brew is pre-infusion of coffee and water before delivery to the brew barrel. Extraction begins earlier and is enhanced with agitation. Full-Brew is not limited by a pressurized brew chamber – a peristaltic pump draws coffee through the grounds bed providing the ability to fully brew up to 20 oz. beverages.
